The state inspectors will ensure we meet the highest quality standards according to building codes. The Advisory Board will follow the Home Builders Association performance guidelines to judge each aspect of the final product. The sample test questions will be on each student's final exam and will be gathered and graded by a faculty member who did not teach the course to ensure blind-scoring.

2. Indicate the standard of success to be used for this assessment.

The standard of success will be 80% of students examined will score a 2 or 3 (see departmental rubric). Success for the state inspection will be to pass inspection.

3. Indicate who will score and analyze the data (data must be blind-scored).

Faculty, department chair, and advisory board members will blind-score and analyze the data.

4. Explain the process for using assessment data to improve the program.

The assessment results will be shared before the beginning of the Winter 2009 term. Any changes that need to be made based on the data will be implemented for Fall 2009. Students enrolled in Winter and Spring/Summer courses will not be effected by the changes. The assessment will determine if the student learning is up to industry and state standards. If there is a weakness in any field, the courses will be adjusted to address those needs.
